

Fatal Rides Oregon, 2001 -2012

Oregon's diverse landscape, beautiful scenery and expansive road network provide the optimal setting for motorcycles to travel, whether it be for work, pleasure or both. Although a leisure activity, motorcycle riding comes with obvious risks and claims hundreds of lives across the United States annually. Combining accident data gathered from National Highway Transportation Safety Administration and the with the Census Bureau's road data, this poster depicts the geographic location and temporal components of all motorcycle accidents that resulted in at least one fatality spanning 2001 - 2012. With the intent to form a better understanding of where and when motorcyclists are most vulnerable.
